

For adults with moderate to severe plaque psoriasis

EMERGE Tremfya[®]

TREMFYA[®] is a prescription medicine used to treat adults with moderate to severe plaque psoriasis who may benefit from taking injections or pills (systemic therapy) or phototherapy (treatment using ultraviolet or UV light).

In clinical studies, 7 out of 10 patients saw 90% clearer skin at 16 weeks. Patients saw improvement in symptoms such as burning, stinging, and itching. Results may vary.

SELECTED IMPORTANT SAFETY INFORMATION

TREMFYA[®] is not for everyone; only your doctor can decide if it's right for you. Do not use if you are allergic to TREMFYA[®]. TREMFYA[®] is a prescription medicine that may cause serious side effects, including serious allergic reactions and infections. TREMFYA[®] affects your immune system. It may increase your risk of infections and lower your ability to fight them. Please read the [Important Safety Information](#) on page 5 and the [Medication Guide](#) for TREMFYA[®] to learn more about these and other risks for TREMFYA[®]. Discuss any questions you have with your doctor.

FDA-approved for adults with moderate to severe plaque psoriasis since 2017

TREMFYA[®] is the first FDA-approved medication of its kind to selectively block IL-23.

90% clearer skin

At 16 weeks

In clinical studies, at least **7 out of 10 patients** saw at least **90% clearer skin**.

At 28 and 48 weeks

In a clinical study, nearly **9 out of 10 patients** who saw **90% clearer skin at 28 weeks** continued to see **90% clearer skin at 48 weeks**.

At 5 years

In a study, nearly **7 out of 10 patients** with **90% clearer skin at 16 weeks** were **still clearer at 5 years**. At 1 year and thereafter, patients and healthcare providers knew that TREMFYA[®] was being used. This may have increased results. Results may vary.

Improves symptoms

In clinical studies at 16 weeks, patients had improvement in symptoms, such as:

Itching

Skin tightness

Burning

Stinging

Pain

Completely clear skin

In one clinical study, 5 out of 10 patients saw completely clear skin or were rated as clear at 16 weeks.

Results you can see

Actual patient

Photos are of a real patient with moderate to severe plaque psoriasis who received TREMFYA[®] 100 mg at weeks 0, 4, and then every 8 weeks.

Individual results may vary.

TREMFYA[®] is a prescription medicine also approved for adults with active psoriatic arthritis

SELECTED IMPORTANT SAFETY INFORMATION

TREMFYA[®] is not for everyone; only your doctor can decide if it's right for you. Do not use if you are allergic to TREMFYA[®]. TREMFYA[®] is a prescription medicine that may cause serious side effects, including serious allergic reactions and infections. TREMFYA[®] affects your immune system. It may increase your risk of infections and lower your ability to fight them. Please read the [Important Safety Information](#) on page 5 and the [Medication Guide](#) for TREMFYA[®] to learn more about these and other risks for TREMFYA[®]. Discuss any questions you have with your doctor.

6 doses per year after 2 starter doses*

First 52 weeks of therapy

2 starter doses at week 0 and week 4

6 maintenance doses

1 dose every 8 weeks

*TREMFYA[®] is a 100 mg injection taken under the skin at weeks 0 and 4, and then every 8 weeks.

TREMFYA[®] is intended for use under the guidance and supervision of a physician. Patients may self-inject after proper training and physician approval.

SELECTED IMPORTANT SAFETY INFORMATION

TREMFYA[®] is not for everyone; only your doctor can decide if it's right for you. Do not use if you are allergic to TREMFYA[®]. TREMFYA[®] is a prescription medicine that may cause serious side effects, including serious allergic reactions and infections. TREMFYA[®] affects your immune system. Discuss any questions you have with your doctor.

The One-Press in 3D

Not actual size

A **patient-controlled self-injection** device that was created with you in mind. The **One-Press** device features an **easy-to-hold** design. And if you're not a fan of seeing needles, you're in luck: One-Press has a hidden needle feature so you won't see the needle unless you go looking for it.

The One-Press patient-controlled injector was awarded the Arthritis Foundation's Ease of Use seal after being tested by patients with psoriatic arthritis.

Your first self-injection should be performed at your doctor's office so he or she can show you the right way to give yourself the injections. After this training, and with your healthcare provider's approval, you may be able to inject at home.

One-Press is an easy-to-hold design that lets you control the injection. Push the handle all the way down to inject the full 100 mg dose.

Please read the **Instructions for Use** in the back pocket before using your TREMFYA[®] One-Press injector and each time you get a refill.

Scan or click the code to see a live One-Press Injector

1. Point your smartphone camera at the marker to get started
2. Rotate and zoom in on the One-Press with your fingers
3. Tap "See It Live" and experience the One-Press in 3D

Tremfya withMe

A SUPPORT PROGRAM BUILT AROUND YOU

Dedicated support throughout your TREMFYA® treatment journey

We're committed to making sure you have what you want, **when you want it**. Your treatment journey is about more than appointments and injections. **It's about you feeling supported.**

TREMFYA withMe Guide

Meet your dedicated TREMFYA withMe Guide, a qualified healthcare professional* who will help you throughout your treatment journey with the support and information you need.

*Guides do not provide medical advice. Please consult your doctor for any questions you have about your disease or therapy.

Prescription and Cost Support

You'll receive support to help you: verify your insurance coverage, understand how to fill your prescriptions, and look for options that could make your treatment more affordable.

Treatment Support

You'll get access to information about your disease, injection support, and how to safely return used syringes or other injection devices. Your doctor is the best person to help you understand what to expect. Your Guide is also available, after you have talked with your doctor, if you have questions about injections.

8:00 AM to 11:00 PM ET

Safe Returns® needle disposal program

If you've received approval from your doctor to inject at home and have been properly trained, you can use Safe Returns® as a simple, safe, and convenient way to dispose of your used syringes or other injection devices—at no cost to you. When you sign up at TREMfYA.com/safe-returns, you will receive a Safe Returns® disposal container in the mail, along with easy-to-follow mail-back instructions.

IMPORTANT SAFETY INFORMATION

What is the most important information I should know about TREMFYA®?

TREMFYA® is a prescription medicine that may cause serious side effects, including:

- **Serious Allergic Reactions.** Stop using TREMFYA® and get emergency medical help right away if you develop any of the following symptoms of a serious allergic reaction:
 - fainting, dizziness, feeling lightheaded (low blood pressure)
 - swelling of your face, eyelids, lips, mouth, tongue or throat
 - trouble breathing or throat tightness
 - chest tightness
 - skin rash, hives
 - itching
- **Infections.** TREMFYA® may lower the ability of your immune system to fight infections and may increase your risk of infections. Your healthcare provider should check you for infections and tuberculosis (TB) before starting treatment with TREMFYA® and may treat you for TB before you begin treatment with TREMFYA® if you have a history of TB or have active TB. Your healthcare provider should watch you closely for signs and symptoms of TB during and after treatment with TREMFYA®.

Tell your healthcare provider right away if you have an infection or have symptoms of an infection, including:

- fever, sweats, or chills
- muscle aches
- weight loss
- cough
- warm, red, or painful skin or sores on your body different from your psoriasis
- diarrhea or stomach pain
- shortness of breath
- blood in your phlegm (mucus)
- burning when you urinate or urinating more often than normal

Do not take TREMFYA® if you have had a serious allergic reaction to guselkumab or any of the ingredients in TREMFYA®.

Before using TREMFYA®, tell your healthcare provider about all of your medical conditions, including if you:

- have any of the conditions or symptoms listed in the section **“What is the most important information I should know about TREMFYA®?”**

- have an infection that does not go away or that keeps coming back.
- have TB or have been in close contact with someone with TB.
- have recently received or are scheduled to receive an immunization (vaccine). You should avoid receiving live vaccines during treatment with TREMFYA®.
- are pregnant or plan to become pregnant. It is not known if TREMFYA® can harm your unborn baby.
- are breastfeeding or plan to breastfeed. It is not known if TREMFYA® passes into your breast milk.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

What are the possible side effects of TREMFYA®? TREMFYA® may cause serious side effects. See “What is the most important information I should know about TREMFYA®?”

The most common side effects of TREMFYA® include: upper respiratory infections, headache, injection site reactions, joint pain (arthralgia), diarrhea, stomach flu (gastroenteritis), fungal skin infections, herpes simplex infections, and bronchitis.

These are not all the possible side effects of TREMFYA®. Call your doctor for medical advice about side effects.

Use TREMFYA® exactly as your healthcare provider tells you to use it.

Please read the full [Prescribing Information](#), including [Medication Guide](#) for TREMFYA®, and discuss any questions that you have with your doctor.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch, or call 1-800-FDA-1088.
